Jumping saddle in printed solid leather. Seat and knee pads leather is specially developed to guarantee the best grip and stability to rider's legs.

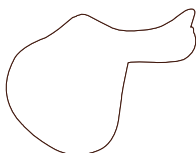

### TREE

The wood spring tree developed by Pariani absorbs and spreads on all its surface any pressure made on the seat and, flexing as on longitudinal as on latitudinal direction, follows perfectly each single movement of horse's back in order to preserve its muscles from any pain or pressures on single points.

### SEAT

Medium Deep.

*Medium deep*

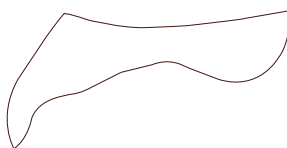

### FLAPS

Knee pads are padded with thermosensitive Memory Foam to allow best grip and comfort to rider's legs.

### PANELS

Panels are pre-moulded and made with expanded polyurethane.

Panels' shape allows support under the knee and a smaller surface under the thigh in order to allow a closer contact.
